

Session 6 Assignment Questions

Please answer your assignments using your own words. Also make sure that if you are getting information from other sources, the source is properly cited or mentioned (APA format preferred), ensuring that you are not submitting work written by others. Uncited sources and AI generated assignments or submissions are considered plagiarism and may result in removal from the course.

Based on what you have learned about the physical development of children, choose an age group, then plan an activity that would enhance the development of the children in your care.

Reference what you learned about the different stages of physical development in order to support why your choice of activity would work well. Use the examples provided in this session as a reference but choose something unique in your answer.

Be sure to explain:

1. How the activity would work (or be adjusted) for different levels of physical literacy.
2. Any cultural considerations that would have to be taken into account during your activity that could limit an individual's participation.
3. How the activity is inclusive - how would children with different needs and abilities be able to participate?
4. Safety - what safety considerations would the ECE have to be aware of or what precautions would they need to take?
