

Session 9 Assignment Questions

Please answer your assignments using your own words. Also make sure that if you are getting information from other sources, the source is properly cited or mentioned (APA format preferred), ensuring that you are not submitting work written by others. Uncited sources and AI generated assignments or submissions are considered plagiarism and may result in removal from the course.

Question 1:

Choose an age group and, referencing the Milestones chart from the Session, identify five ways you can support the social and emotional development of children 6-12 years old.

Question 2:

Understanding how to support children's mental health is critical to their healthy social and emotional development. For 6-12 years old, research both the typical mental health challenges children those ages may face, as well as two different community resources you could draw on to support these children as an early childhood educator. Complete the table below.

Typical mental health challenges:		
Resource Name	Contact Information (email address and address)	How can childcare facilities use their services to enhance their programs?
